¹ In thousands of barrels of oil per day (for both production and consumption). Note that we have added Sudan as a reference.

Production by region
Million barrels daily

World oil production fell by 130,000b/d in 2007. OPEC production cuts led to a decline of 350,000b/d. OECD production dropped again, driven by declines in Mexico and Norway of more than 200,000b/d each. Former Soviet Union production rose by nearly 500,000b/d as both Russian and Azerbaijani output rose by at least 200,000b/d.
